

SUMMARY

Data Analyst with 4+ years of experience delivering end-to-end analytics and automation solutions that improve data reliability and operational efficiency. Skilled in SQL, Power BI, and Power Automate, with experience leveraging AWS and GCP for cloud-based data processing and reporting. Proven ability to translate complex business requirements into actionable insights while strengthening data governance and cross-functional alignment

TECHNICAL SKILLS

Programming: Python, SQL, HTML, CSS

Frameworks/Tools: Pandas, NumPy, Scikit-learn, NLTK, Flask, Tableau, Power BI, SSIS, Git, VS Code, Docker, Kubernetes, Databricks

Cloud Technologies and Databases: AWS (S3, EC2), Azure, Postgresql, Oracle, Microsoft SQL Server, Google Big Query

AI Practices: Natural Language Processing (NLP), Sentiment Analysis, Text Classification, Regression Analysis, Data Visualization, Predictive Modeling, Fast API'S , Pydantic Models, Kedros

PROFESSIONAL EXPERIENCE

Data Analyst– AI Development, Rogue Lumen

March 2025 – Present

- Developed a sentiment analysis workflow in Python to analyze multi-source API data using NLP models, improving emotion classification accuracy by 30% and enabling deeper customer insight generation.
- Automated data collection and transformation across APIs, BigQuery, PostgreSQL, and Neo4j to streamline analytics workflows, reducing manual effort by 60% and accelerating reporting turnaround by 25%.
- Built interactive dashboards to track sentiment trends and key operational metrics, increasing stakeholder engagement by 25% and supporting data-driven decision-making.
- Developed AI-driven email automation and web data extraction processes to enhance reporting efficiency and expand manufacturer data coverage by 42%, supporting faster stakeholder communication and informed decision-making
- Implemented scheduled data extraction and preprocessing using Python and LLaMA tokenization for Ziosk datasets, improving data freshness and reliability for downstream analysis by 30%.

Data Analyst , Arizona State University

June 2024 – March 2025

- Consolidated operational data from 15+ nuclear power facilities across multiple U.S. states into a centralized analytics repository, enabling standardized regulatory reporting and cross-site performance benchmarking.
- Automated data preparation workflows using Python, Excel, MySQL, and AWS S3, reducing manual processing time by 70% and improving data accuracy for compliance and executive reporting.
- Optimized complex SQL queries and data preparation processes, improving query performance by 40% and reducing issue resolution time by 25%.
- Strengthened multi-source data integration and validation processes, accelerating reporting cycles while ensuring regulatory compliance and system reliability across client platforms.

Junior Data Analyst, Tata Consultancy Pvt LTD | Hyderabad, India

June 2019 – July 2022

- Designed a suite of 100+ interactive Tableau dashboards, automating real-time service metric tracking and eliminating 50% of manual reporting overhead.
- Refactored high-complexity SQL queries across 15+ client projects, accelerating data retrieval speeds by 40% and optimizing database performance.
- Engineered data enhancement frameworks that reduced incident resolution time by 25%, improving system reliability and stakeholder trust.
- Standardized reporting protocols for TPG Telecom, transforming fragmented datasets into actionable executive insights through scalable visualization logic.

PROJECTS

LLM-Powered Q&A Analytics Chatbot | LangChain, Python

March 2026

- Developed a LangChain-based Q&A chatbot enabling natural language querying over structured and unstructured datasets, reducing manual data exploration and improving stakeholder insight access.

Stress Monitoring Classification Model | Python, Scikit-learn, Pandas

December 2025

- Built a supervised classification model to predict stress levels from behavioral and physiological data, uncovering key indicators and supporting data-driven interventions.

EDUCATION

Master's of Science in Information Technology

Aug'22 – May'24

Arizona State University | Arizona US

Coursework: Cloud Computing, Data Visualization, Statistical Machine Learning, Big Data Analytics, Project Management, Deep Learning, Natural Language Processing

Bachelors in Engineering

Aug' 15 - July '19

Osmania University|India
